

**Innovative operator compartment
for relaxed and safe operation**

**Powerful 3-phase AC drive motor
for the highest performance**

**ShockProtect to protect operator,
truck and load**

**"SmartPilot" electric tiller for precise,
effortless steering**

**Curve Control for increased safety
when cornering**

Foldable stand-on platform (optional)

ERE 225

Electric powered pallet truck with stand-on platform (2500 kg)

The ERE 225 is the perfect truck for high performance loading and offloading of lorries as well as the rapid transportation of heavy loads over longer distances. Due to the sideways operators position this allows higher speeds, and high production can be achieved transporting loads.

The operator compartment is laid out to suit the requirements of the operator:

- Innovative operator concept for safe travel during both forward and reverse manoeuvring.
- Extra high sides to the operator compartment ensure exceptional operator protection.

- A variety of options as well as a height-adjustable tiller ensure the ergonomic and fatigue-free operation of the truck over the entire shift.

Also there are many safety features and driver comforts for every application :

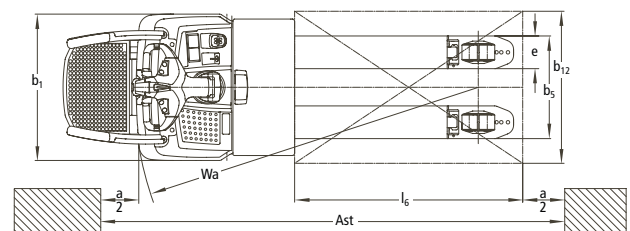

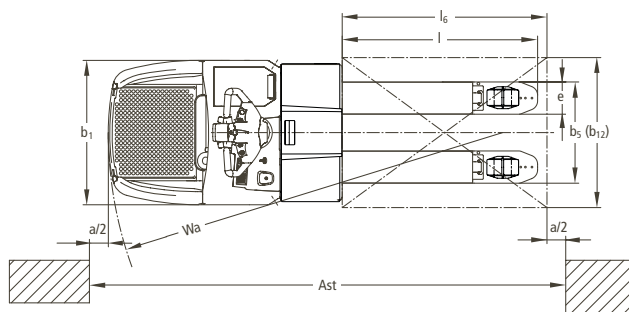

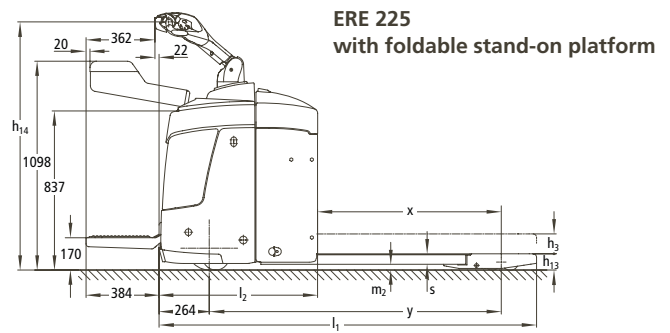

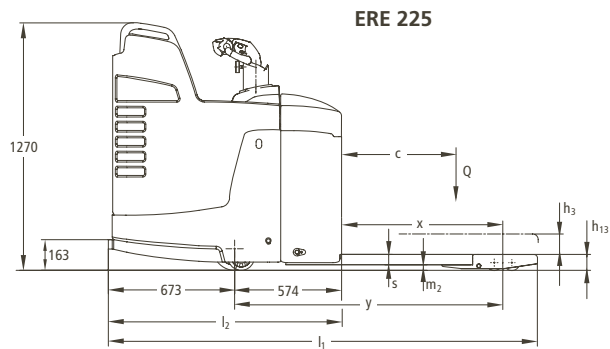

- As well as cushioned stand-on platform, the drive motor is dampened using the "ShockProtect" system.
- With "ShockProtect" the stand-on platform is shielded from shocks. The advantages: reduced strain on the operator's back and less stress on the chassis and components of the ERE 225.

- Especially during demanding situations or heavy reversing, maximum safety is ensured by the enclosed sides and fixed stand-on platform.

- The speed during cornering is automatically reduced dependent on steering angle (Curve Control).

For really demanding applications, high performance batteries up to 465 Ah are available and for multi-shift applications, the ERE 225 is available with sideways battery exit (optional). For operation in confined spaces, the ERE 225 is available with a foldable stand-on platform (optional).

ERE 225

Technical Data in line with VDI 2198 as at: 10/2008

Identification	1.1	Manufacturer (abbreviation)		Jungheinrich	Jungheinrich	1.1
	1.2	Manufacturer's type designation		ERE 225 (fixed platform)	ERE 225 (foldable stand-on platform)	1.2
	1.3	Drive		electric	electric	1.3
	1.4	Operator type		stand	pedestrian/stand	1.4
	1.5	Load capacity/rated load	Q (t)	2,5	2,5	1.5

- 1) load section lowered: + 55 mm
2) diagonal acc. to VDI: + 368 mm
3) diagonal acc. to VDI: + 204 mm
4) with sideways battery exit: + 72,5 mm
5) with platform down: + 384 mm

Make use of the advantages

Powerful 3-phase AC drive motor and "intelligent" electronic controller

Progressive drive technology and control electronics (SpeedControl) ensure safe and energy saving operation with adjustment to every application:

- The speed set by the accelerator is maintained in every travel situation – even during climbing and descending gradients and slopes.
- The ERE 225 is protected against unintended rollback on ramps by automatic brake activation.
- Energy is returned to the battery during speed reduction using regenerative braking.

ERE 225 with foldable stand-on platform

Comfortable workplace

Travel with the forks trailing with the ERE 225

- Various storage areas for operator paperwork, clipboard etc.

Foldable stand-on platform (optional)

- A choice of options pedestrian/ride-on operation.
- Reduced travel speeds; ride-on, when side protection/support arms are folded-in (6 km/h) and in pedestrian operation (4 km/h).
- Minimum working area requirement.

Optimum handling characteristics

- Sprung and cushioned support wheels connected via the torsion bar ProTraLink system, ensure safe handling in all situations.
- Jungheinrich ShockProtect: protection for operator, truck and load through additional suppression/suspension of the drive train. The suspension minimises shocks to the operator and chassis.

Always informed

- Information display "CanDis" (optional) with additional "operating hours" display and service code memory.

Ergonomic steering

The newly developed tiller head is easily adjustable to the ergonomic needs of the operator.

- Clear colour coded buttons with abrasion resistant symbols for intuitive operation.
- Comfortable and well arranged operator compartment.
- Contactless sensor system protected in accordance with IP 65.
- Rocker switch for intuitive and safe operation of hydraulic functions.
- Height-adjustable tiller head (optional).

Reduced maintenance

- Easy access to all components through an easily removable one-piece motor cover.
- Activation of maximum travel speed only by suitably raised forks ensures a reliable reduction in wear under the forks (optional).

Longer times in operation

Battery capacities with up to 465 Ah ensure longer times in operation:

- Battery compartment L: 3 EPzS 375 Ah.
- Battery compartment L-high: 3 EPzS 465 Ah.
- Side battery replacement (optional) for fast battery change in multi-shift applications.

Additional equipment

- Entry rollers.
- Load protection frame.
- Cold store application.

Safer and more ergonomic operator compartment

The workplace is adjusted to fit operator and application requirements:

- New operator position: when travelling with the forks trailing, the operator can stand sideways and hold themselves steady with one hand on the tiller, and the other on the fixed platform handle, therefore maintaining full control of the vehicle at all times.
- The operator compartment is symmetrically arranged for easy operation by both right-handed and left-handed operators.
